

# Chestnut Ridge Park Beginner Permanent Course

MAGNETIC NORTH

## Control Descriptions

1. Trail Junction

2. Reentrant (small gully)

3. Stream Junction

4. Trail Junction

5. Building - NE side

6. Hilltop

## LEGEND

	paved road
	paved area, gravel area
	dirt road, vehicle track
	footpath: wide, small
	indistinct footpath
	narrow firebreak or tree cut
	fence, high fence
	ruined fence
	building, open shelter
	ruin, small ruin
	man-made object, cliff, tree stand
	boulder, boulder cluster
	stony ground, rock pile
	pond, uncrossable stream
	small stream, small footbridge, intermittent stream
	narrow marsh, spring, well
	marsh: crossable, uncrossable
	diffuse marsh, small marsh
	contour lines, form lines
	gully, dry ditch, earth bank
	depression: large, small; impassable cliff
	knoll, pit, rootstock
	distinct tree, small distinct thicket
	open land, rough open
	forest: easy (white), slow, difficult, fight
	undergrowth: slow, difficult
	rough open: slow, difficult
	scattered trees: open, rough open
	vegetation boundaries, indistinct
	vegetation boundaries, distinct
	out of bounds
	approximate park boundary

Scale = 1:7,500 Contour Interval = 5 m

2023 Buffalo Orienteering Club

# ORIENTEERING

## Chestnut Ridge Park Beginner Permanent Course

Created by Ryan Wolfling, of Boy Scout Troop 599 of East Aurora, as his Eagle Scout Service Project.

### HOW TO DO IT

1. Using the map, navigate to the locations indicated by the small circles. A compass will help you walk in the right direction but is not necessary on this course.
2. At the location, you'll find a 4" x 4" post. On top of the post an orange marker will be attached. This is called a "control."
3. The number on the control will correspond to the number by the circle on the map. Also on the control will be a number "code". Copy this code in the box by the control description.
4. You can visit the controls in any order you wish.
5. The start is located at coordinates 42°43'00.9"N, 78°44'24.6"W. The google map link is: <https://goo.gl/maps/SNhUbgqCbaBrud7w5>

### HINTS FOR SUCCESS

1. Orienteering is a great family or group activity. But, if you go by yourself, tell someone where you are going.
2. "Orient" the map every time you look at it. That is, turn the map so that the map North points toward Magnetic North as shown by a compass. This will put the map "in sync" with the terrain and will make it easier to read.
3. Have a plan in mind for which features to follow to get to the control, such as a road, trail or stream.
4. Hold the map in your hand and find your current location.
5. The controls are mounted to the top of 4 x 4 posts, so you may have to look carefully to see some of them. In general, if you are at the feature described in the "Control Descriptions" and you turn in a circle, you will be able to spot it.
6. Keep in mind that maps are drawn by people and the mapper's decisions on what to show and how to show it might not be the same as what your decisions would be. Do not be surprised if you come across new features that are not shown on the map. Please be aware that the map may not be up to date and some trails and vegetation boundaries might have changed.
